## Contego® Hygienic Weighing Module

### 100 kg... 2 t, Type D1/C3

- Compact and absolute hygienic weighing solution for the load range up to 2 t
- Quick and seamless installation
- Easy cleaning without residue
- High chemical resistance
- Protective cover made of FDA-compliant silicone
- Integrated functions like lift-off protection, jack-up function and constrainer for horizontal forces
- Proven rocker-pin principle
- Ex version available
- W & M approval (acc. to OIML R60)
- EHEDG-certified
- High ingress protection by using protection class IP69K

### Application

The Contego® Hygienic Weighing Module has been designed especially for the instrumentation of process vessels in which ease of cleaning and avoidance of hygienically critical areas are highly important for a safe and efficient production process.

The weighing module can be used for all types of process vessels like production, mixing, charging and storage vessels, as well as intermediate and permanent storage tanks. The use of the hygienic weighing module allows a significant reduction in cleaning effort and, at the same time, decreases the contamination risk for products.

The use of high-quality materials provides high chemical resistance and therefore guarantees reliable long-term use, even when cleaning frequently with aggressive cleaning agents.

### Product Profile

A special design feature is the consistent implementation of the construction principles for hygienic design according to the specifications of the European Hygienic Engineering Design Group (EHEDG).

Additionally, no compromises were made in selecting the materials. They are oriented towards internationally certified standards and provisions as well. The Contego® mounting plates are made of stainless steel grade 1.4404 and provide solid protection against corrosion even when using strong cleaning agents.

The protective cover made of FDA-compliant silicone ensures a reliable encapsulation of the module and prevents the intrusion of dirt and microorganisms. The well thought-out connecting geometry between protective cover and mounting plates guarantees a safe fitting and, together with the already excellent resistance to aging of the silicone, ensures reliable protection over years.

The Contego® weighing module therefore represents an absolutely hygienic unity of load cell and installation kit. As a result, you can refrain from using other expensive and complicated constructions to protect the weighing technology against dirt.

Besides the hygienic aspect, the Contego® weighing module provides all the other important mechatronic functions for a fast operational startup and reliable results. Therefore, this weighing module has an integrated constrain, which holds the process vessel in the proper position and, at the same time, allows movement through thermal expansion of the vessel. The integrated lift-off protector is a reliable safety feature to protect the vessel from tilting. At the same time, this feature can be used as a lifting system as well. This way, the vessel leg can be raised a few millimeters without using supplemental tools.

A PR 6241 S-type load cell is used with this module. This series is distinguished by its unmatched reliability, robustness and stability, enabling years of undisturbed usage without any readjustment, not to mention the high measuring accuracy and reproducibility.

### Load Cell Construction

S-shaped version for torque-free load application. Made of pure stainless steel, hermetically sealed and filled with protective gas.

### Material

Load cell: 1.4542 (AISI 630, 17-4PH)  
Mounting parts: 1.4404 (AISI 316L)  
Bellow: Silicone

### Ingress protection

Load cell: IP68 in accordance with IEC 60529: 1.5 m water column/10,000h.  
Weighing module: IP69K, according to DIN 40050: water under high pressure, steam cleaning

### Cable

Robust, flexible, screened,  
Cable  $4 \times 0.35 \text{ mm}^2$   
Sheath: TPE thermoplastic elastomer  
Color: gray  
for PR 6241/.. E: blue

Diameter: 5 mm, length: 5 m

Bending radius:

Fixed installation:  $\geq 25 \text{ mm}$

Flexible installation:  $\geq 75 \text{ mm}$

### Certificates of conformity

Valid for: Contego...Ex

Marking: II 1G EEx ia IIC T6,

II 1D IP65 85°C

Registration number: PTB 02 ATEX 2059,

TÜV 03 ATEX 2301x

Usable for explosion hazard subgroups IIA, IIB and III. IIC on request.

### Technical Data: Metrological

		Abbr.	D1	C3	
Accuracy Class			0.04	0.015	% $E_{\max}$
Minimal dead load	Lowest limit of specified measuring range	$E_{\min}$	0	0	
Rated capacity	Highest limit of specified measuring range	$E_{\max}$	See table		
Max. usable load	Upper limit of measurements	$E_u$	150	150	% $E_{\max}$
Destructive load	Danger of mechanical destruction	$E_d$	> 300	> 300	% $E_{\max}$
Minimum LC verification	Minimum load cell verification interval ( $v_{\min} = E_{\max}/Y$ )	Y	5,000	14,000	
Deadload output return	Factor for dead load output return after load ( $DR = 1/2 \times E_{\max}/Z$ )	Z	1,000	3,000	
Rated output	Relative output at nominal load	$C_n$	2	2	mV/V
Tolerance on rated output	Permissible deviation from rated output	$d_c$	< 0.25	< 0.07	% $C_n$
Zero output signal	Load cell output signal under unloaded condition	$S_{\min}$	< 1.0	< 1.0	% $C_n$
Repeatability error	Max. change in load cell output for repeated loading	$E_R$	< 0.01	< 0.005	% $C_n$
Creep, during 30min	Max. change in load cell output under nominal load	$d_{cr}$	< 0.03	< 0.015	% $C_n$
Linearity	Max. deviation from best straight line through zero	$d_{lin}$	< 0.03	< 0.01	% $C_n$
Hysteresis	Max. difference in LC output between loading and unloading characteristic	$d_{hy}$	< 0.04	< 0.015	% $C_n$
Temperature effect on $S_{\min}$	Max. change of $S_{\min}$ per 10K over BT referred to $C_n$	$TK_{S_{\min}}$	< 0.028	< 0.01	% $C_n/10 \text{ K}$
Temperature effect on C	Max. change of C per 10K over BT referred to $C_n$	$TK_c$	< 0.03	< 0.01	% $C_n/10 \text{ K}$
Input impedance	Between supply terminals	$R_{LC}$	$650 \pm 6$	$650 \pm 6$	$\Omega$
Output impedance	Between measurement terminals	$R_O$	$610 \pm 1$	$610 \pm 0.5$	$\Omega$
Insulation impedance	Between inner circuit and housing at $100V_{DC}$	$R_{IS}$	$> 5,000 \times 10^6$	$> 5,000 \times 10^6$	$\Omega$
Insulation voltage	Between circuit and housing (Ex version only)		500	500	V
Nominal supply voltage	To hold the specified performance	$B_u$	4... 24	4... 24	V
Nominal ambient temperature range	To hold the specified performance	$B_T$	-10... +55	-10... +55	°C
Usable ambient temp. range	Permissible for continuous operation without damage	$B_{TU}$	-40... +95	-40... +95	°C
Storage temperature range	Transportation and storage	$B_{TI}$	-40... +95	-40... +95	°C
Permissible eccentricity	Permissible displacement from nominal load line	$S_{ex}$	5	5	mm
Vibration resistance	Resistance against oscillations (IEC 68-2-6 Fc)		20 g, 100 h, 10... 150 Hz	20 g, 100 h, 10... 150 Hz	
Ambient pressure impact	Influence ambient of air pressure on $S_{\min}$	$PK_{S_{\min}}$	0.005	0.0025	% $C_n/\text{kPa}$
Nominal deflection	Max. elastic deformation under nominal load	$S_{nom}$	< 0.5	< 0.5	mm

### Technical Data: Mechanical

Maximum permissible horizontal force	7 kN
Horizontal destructive force	> 30 kN
Maximum permissible vertical load without load cell	1.5 t
Maximum permissible lift-off force	8 kN
Maximum permissible load for jack-up	1.5 t
